

## CSE442 - Software Engineering Presentation Rubric

	<b>Unsatisfactory (0)</b>	<b>Developing (8)</b>	<b>Satisfactory (17)</b>	<b>Exemplary (25)</b>
Project Description	The team did not describe the project or the goals of their software	The description of the project is unclear. The audience would not know what the software is supposed to do without further explanation	The description of the project was mostly clear, but with some details missing such that it was unclear what the software is supposed to accomplish	The presentation contained a clear and self-contained description of the project. Someone with no prior knowledge of the project would understand the goals of the software from the presentation alone
Software Demo	Presentation did not show working software	There were issues with the live demo that notably detracted from the presentation (ex. The audience was waiting while the team debugged their app for more than a few seconds. If this happens to your team, have someone talk during the debugging process) -OR- used a prerecorded demo for software that could easily be shown during the live presentation	The team showed a live demo of their software, but there were issues or it was not clear how the demo fulfilled the description of the project	The presentation showed an accurate demo of the current software (This should be a live demo of the running software. In cases where this is not simple - ex VR app - a prerecorded video demo can be used)
Technical Details	Technical details were not mentioned	The technical details are unclear. A competent developer would not have a idea of the architecture of the software after the presentation	The team explained the technical details of their project, but some technologies were not mentioned (ex. App uses a database but the specific database used was not mentioned)	The presentation described an overview of the technical details of the project including technologies used and how they interact with each other
Professional	The presentation was completely unorganized and the team was clearly not prepared to present -OR- Did not fill the allotted time (finished >5 minutes early)	The presentation was unorganized, hard to follow, or clearly was not rehearsed -OR- Exceeded the allotted time -OR- Did not fill most of the allotted time (finished >2 minutes early)	The presentation was mostly professional, easy to follow, and used the allotted time, but with some issues that detracted from the content of the presentation	The presentation was professionally delivered and used most of the allotted time without going over
